RE: Site Inspection, Henrietta #21 Quarry, S/003/029, Box Elder County, Utah

Date of Inspection: June 13, 1995
Time of Inspection: 11:30 a.m.
Conditions: Partly cloudy, hot
Participants: Gordon Struthers, U.S. Forest Service; Randy Wilde, Bear River Association Health Department;; Lynn Kunzler, DOGM

Purpose of Inspection: To document site conditions.

This quarry is located approximately 1 mile south of the Dove Creek Quarry. This is an old quarry of approximately 5 acres in size. However, for the most part, this quarry appears to have not been worked in excess of 15-20 years. On the southern end, there were two small areas where it appears that there had been recent digging within the last year. These areas combined were less than 1/2 acre. It also appears that perhaps the Bown's equipment has been up here working this site, due to some oil spills that were in this area. From the condition of the access road and the other roads we used as we left the area, this site is used rarely, with some vegetation growing up in the tracks of the road itself.
